ELECTIVES PROGRAM

For passionate & ambitious students

partnerships@yaizy.io

The YaizY Program

YaizY improves the quality and relevance of education by blending future-needs based Intended Learning Outcomes (ILO) frameworks with experiential learning

All YaizY courses are created and taught around the jobs of the future, and focus on developing the most in-demand skills and competencies required by them.

Enabled via our innovative online live learning platform, the YaizY curriculum features a real-play approach. Every course maximizes student engagement through exclusively designed lesson formats that incorporate interactive scenario-driven challenges, and result in real-world products.

Emphasizing a growth mindset and passion discovery, the YaizY program enhances kids' performance and outcomes across core curriculum subjects. In addition to early exposure to career orientation, students develop an extensive project portfolio which improves their chances of acceptance to competitive universities.

Intended Learning Outcomes framework is central to YaizY education

We collaborate with expert practitioners in the areas defining Jobs of the Future to create target career profiles, and we design our adaptive, experiential learning process to prepare kids to succeed in these tracks. Our method enables our school partners to provide a state-of-the-art education for kids that is career-focused and builds on their passions.

Live game-based learning

While rigorous, all YaizY courses are deeply engaging and centered around exciting superstories that cater to student interests. Lessons incorporate interactive mechanics that enable mastery of real-life instruments.

Social-emotional skills development

Small class sizes and innovative lesson activities fuse self-paced learning with meaningful peer engagement.

As they develop a growth mindset, students learn to motivate themselves and others, improve communication and collaboration, develop critical thinking, and activate creativity—plus so much more!

Improved learning outcomes and career preparation

Projects are based on real-world applications. Guided by modern assessment methods, students progress through mastery levels and obtain all necessary skills for success in the most exciting and future-proof careers.

Flexible Formats

ADAPTABLE TO
ANY SCHOOL

We are flexible in our teaching models:

Instructors

- We provide our trained YaizY teachers **or**
- We mentor your educators to teach our curriculum, and onboard them to the YaizY platform

Implementation

- We customize various programs including: electives, career orientation, after-school and summer school

EXAMPLE REAL LIFE INSTRUMENTS

Real-Play

IN 4 FUTURE-MINDED TRACKS

Real-Play is the YaizY method of immersing students in scenario driven projects while leading them through increasingly sophisticated mastery levels to develop complex competencies and soft skills

Computing track includes courses specializing in developing and advancing practical coding skills. Kids learn how to program and understand computer code.

Leadership & Entrepreneurship track gives students the tools to develop projects from the ground up, pitch to investors, and even launch a start-up.

Design & Multimedia Arts track educates kids in design thinking and teaches them how to develop impactful creative content.

Innovation track enables students to ideate and implement creative solutions, improve critical thinking in multidisciplinary subjects and develop an innovative mindset.

25,000+
students

across the US, UK, Israel,
and Singapore have
experienced the Yaizy way.

Immersive Learning

ON YAIZY WEB-BASED PLATFORM

- Combination of game-based mechanics and integration of platforms that develop hard skills like Roblox Studio, Scratch, and Python to enable Real-Play

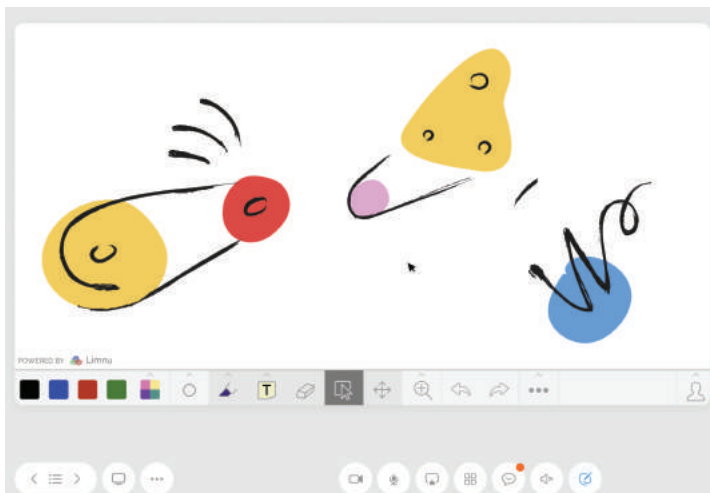

Interactive Lesson Activity

YaizY for Teachers

- Seamless live-online learning experience including:
 - Video lessons with interactive features like a collaborative whiteboard, breakout rooms and much more
 - Advanced LMS including student and teacher dashboards, storage for all course materials and students' projects

YaizY Collaborative Whiteboard

- The interactive platform enables teachers to transform each lesson into an immersive experience by incorporating games and fun interactive assignments
- Teachers have full control over the course and individual lesson process, including the ability to live track progress of every student
- In-lesson features including breakout rooms and chat functionality promote meaningful student-teacher collaboration and custom classroom structuring

Symbiotic

FOR EXISTING CURRICULUM

Every component of the Yaizy program is designed to enhance core school curriculums:

- Improve overall student outcomes
- Promote internal motivation
- Develop social-emotional and learning & innovation skills
- Increase chances of admission to competitive colleges
- Build individual career paths

Passion to Profession

By partnering with YaizY, schools not only contribute to the holistic development of kids, but also strengthen their college and career planning proposition for student families.
